

Connecting Research & Education communities in the Eastern Partnership

Maria Minaricova, EaPConnect Project Manager

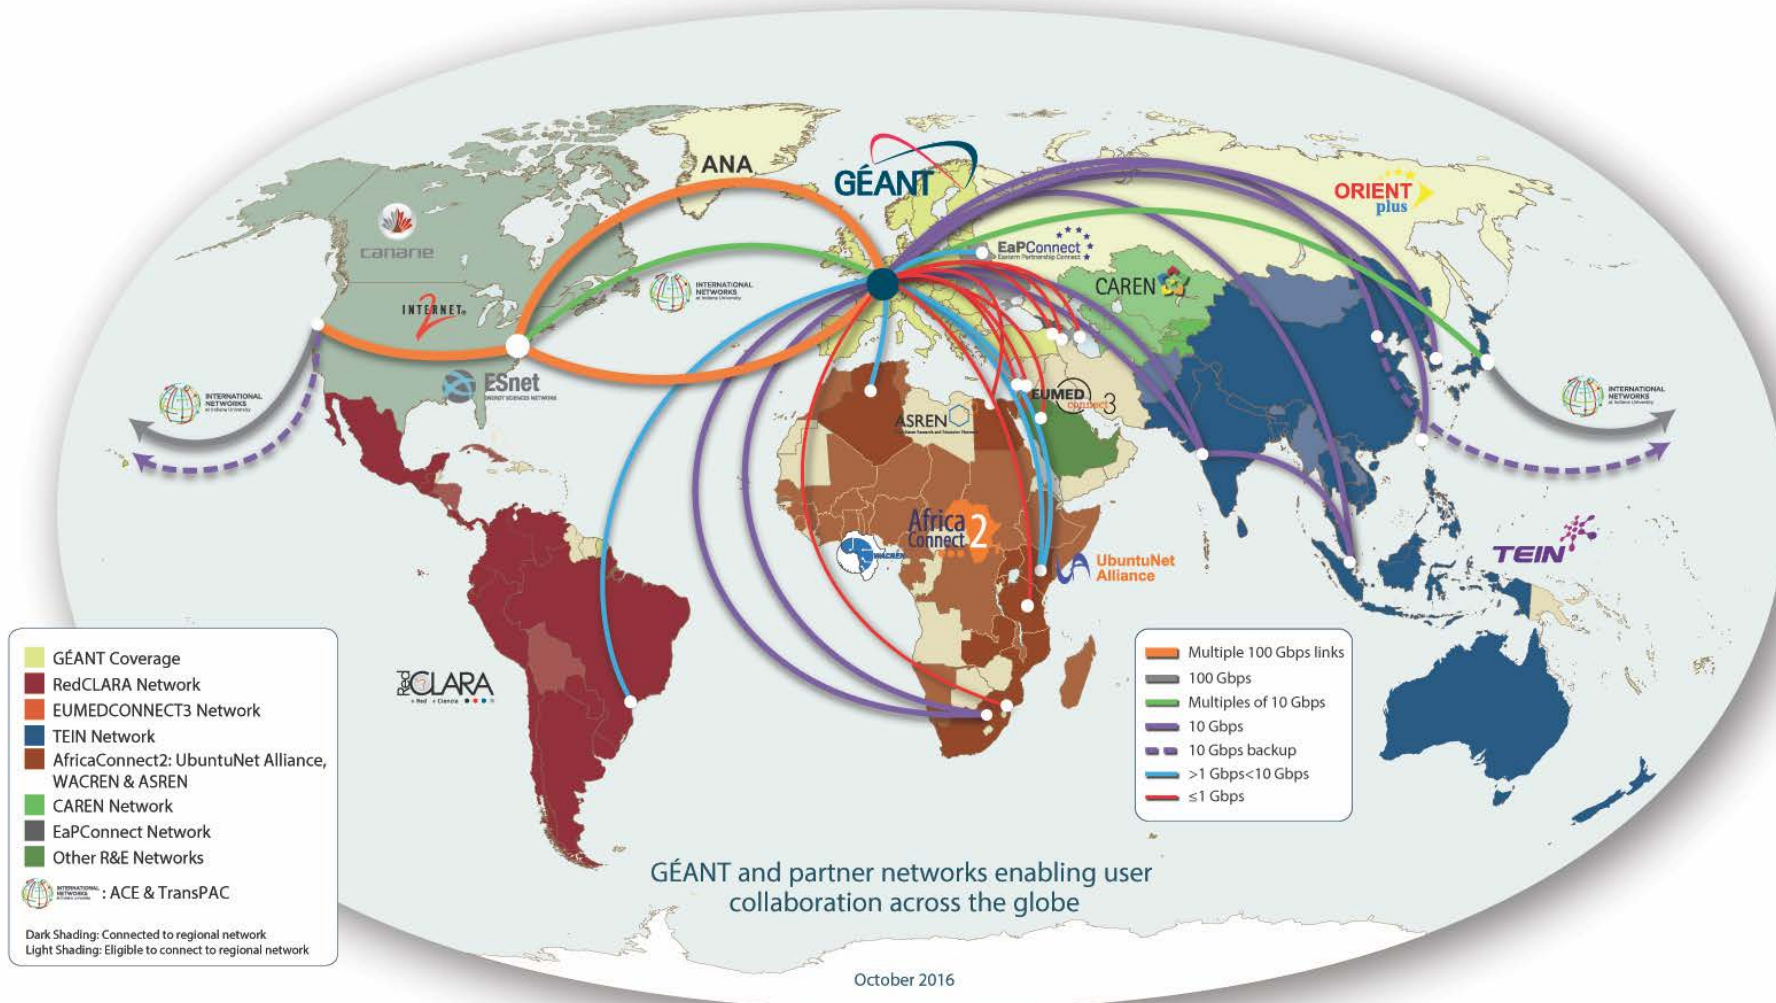

Tbilisi, Georgia
6th October 2016

EaPConnect project

- **European Commission co-funded** project of €13M – a partnership between European Union and Armenia, Azerbaijan, Belarus, Georgia, Moldova and Ukraine
- Creates a regional eInfrastructure - **high capacity** and **very reliable** internet network **dedicated to research & education**
- Connection to pan-European GÉANT network enables:
 - scientists, students and academics to **engage in global collaborative projects**
 - brings Eastern partnership countries closer to EU
- **Coordinated by GEANT** in **collaboration** with the **EU National Research and Education Networks (NRENs)**

Why cooperate with Europe?

- Universities and researchers work internationally
 - In Europe we have created an e-infrastructure that helps our users to do the most advanced research and teaching
 - Together we can innovate and bring the most advanced ICT capabilities to our researchers
- Economy of scale
 - Sharing International and intercontinental bandwidth (expensive)
 - Buying services together (buying power)
- Need to coordinate standards and practices
 - So interworking within Europe is as seamless as possible

EaPConnect and other eInfrastructures

- Essential for modern R&E activity.

Researchers

all over Europe need to collaborate

- Science needs advanced experimental facilities
- Large-scale research facilities are expensive and need to be shared e.g. CERN, ESA
- Based all over the world

Education

needs connectivity and services too

- Empower students and professors to access knowledge from many sources
- Ensure up-to-date materials
- Individualise education – tailors it to the needs of students
- Prepare students for the future
- Facilitate student exchanges at all levels

Supporting the growth of EaP

Enabling access.

A connection to GÉANT enhances the ability of Eastern Partnership members to:

Collaborate

- Collaborate more effectively with European researchers

Participate

- Participate in EC funded projects

Access

- Access research instruments across Europe
- Work on high profile projects which require high bandwidth

Share

- Receive and offer expertise in networking

EaPConnect network: Benefits

- Very high quality network connectivity:
 - equal opportunity for access to resources throughout Europe
 - enables researchers, academics and scientists throughout Europe to collaborate **regardless of geographic location**

User services: Mobility, Trust and Identity

Open your
laptop and be
on-line

Supports Identity
Federations
Worldwide

Interconnects Identity
Federations around the
world

Trusted Certificate
Service

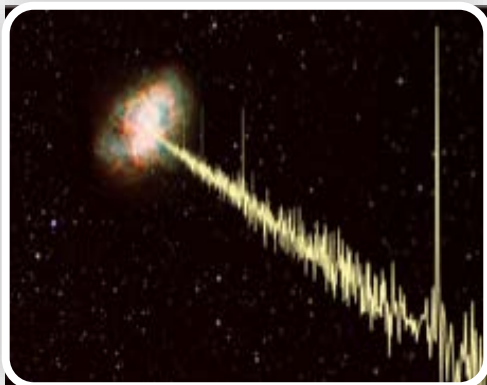

Benefits for the region

- Supports applications with high societal impact, such as **telemedicine** and **environmental monitoring**
- Increased participation in **Horizon 2020** projects and other global R&E collaborations
- **Bridges the digital divide**
- Helps bring the EaP countries closer to the EU

Big Big Data

Radio Astronomy — Pulsar
Research

Next Generation DNA Sequencing

8K+ Video Distribution Testbed

Centralized Imaging for Large
Scale Population Imaging Studies

Jungle Computing and Multi-Model
Multi-Kernel Simulations

**Climate Modeling for Scientist
and Decision Makers**

Beneficiaries of EaPConnect

Armenia	IIAP NAS RA The Institute for Informatics and Automation Problems of the National Academy of Sciences of the Republic of Armenia
Azerbaijan	AzScienceNet The Institute of Information Technology of Azerbaijan National Academy of Sciences
Belarus	UIIP NASB / BASNET The United Institute of Informatics Problems National Academy of Sciences of Belarus
Georgia	GRENA The Georgian Research and Educational Networking Association
Moldova	RENAM The Research and Educational Networking Association of Moldova
Ukraine	URAN Association The Association of Users of Ukrainian Research and Academic Network

What does this mean in practice?

EaP NRENs delivering

- connect universities and research institutions in each country
- connect to GÉANT (data access to international project)

- deploy new services

- Participate in international collaboration projects –

Supporting the growth of R&E Communities

- *transforming how researchers collaborate*

EaPConnect will deliver real value and benefit to society by enabling research communities to transform the way they collaborate on ground breaking research

*Together with
Europe's NRENs,
GÉANT connects
50 million users in
10,000 institutions
across Europe*

Health and Medicine | **Energy** | Environment | **Particle Physics**
Radio Astronomy | Arts & Education | **Society**

How can I connect?

To benefit from the EaPConnect infrastructure, prospective users should contact their local NREN to find out how to join the project

Country	NREN	Website
Armenia	IIAP NAS RA	www.iiap.sci.am
Azerbaijan	AzScienceNet	www.azsciencenet.az
Belarus	UIIP NASB	www.uiip.bas-net.by
Georgia	GRENA	www.grena.ge
Moldova	RENAM	www.renam.med
Ukraine	URAN	www.uran.ua
